

Cochrane Review proposals

[Version history](#)

Policy

All proposed Cochrane Reviews must be agreed with the relevant Cochrane Review Group and registered as titles with that Cochrane Review Group.

This prevents duplication of effort, ensures the topic is appropriate for a Cochrane Review, and complements the existing and ongoing work of the Cochrane Review Group.

For prospective authors

Authors interested in working on a particular review should refer to details and process described on the Cochrane Community website: [Proposing and registering new reviews](#).

For editorial teams

Refer to [Proposals for new Cochrane Reviews: editorial management](#).
