

Re-use of Cochrane Reviews for users and third parties

The *Cochrane Database of Systematic Reviews* uses RightsLink®, the automated, online permissions clearing system from the Copyright Clearance Center. Requests to re-use or republish figures, tables, extracts and entire reviews can now be cleared online and a license providing details of the permission and the terms and conditions of the re-use is available for immediate download.

For more information, visit the Cochrane Library [permissions and reprints webpage](#).
