

Contact Person's details in reviews

This page contains information on changes currently visible on the training server. If you have any queries please contact support@cochrane.org.

An author must have a Cochrane Account and a record in Archie to be added to a review. See [Document roles](#).

When an author is allocated the Document role of Contact Person, Archie automatically duplicates the personal contact address address and adds it to the Contact details section in RevMan Web.

All further changes to Contact details must be made in RevMan Web. See [Authors and affiliations](#).
