Authors using a group name

Cochrane Reviews may be authored by a group of authors who also choose to use a group name. Separate the list of the individual authors from the group name (if used) with either '[insert last individual author]; for the [insert group name]' or '[insert last individual author]; [insert group name]'. For example:

- Smith A, Davis B, Jones C; for the TOPIC Group. Article title. Etc
- Smith A, Davis B, Jones C; TOPIC Group. Article title. Etc

This approach is based on a recommendation by the Council of Science Editors.

For Editors: see Authors using group name: Archie and RevMan guidance
