

# Reporting on authors and publications

- Archie contains accurate and up-to-date information on review authors and publications by country which can be accessed by Cochrane Geographic Group staff at any time.

## Global Reports

You can use the 'Global Reports' option under 'Tools' in Archie, to find a total number of reviews published per country, in the most recent issue of the Library. See [Global Reports](#). If you run this report each month and record the results, you will build up a picture of the monthly and yearly output by authors from your country.

## Advanced searches

Examples of advanced searches that can be run in Archie are given below:

1. Active authors in a given country
2. Active authors who are also Contact Person on a review, in a given country
3. Active authors with review published in a given period, in a given country

## Saving searches

You can save, name and re-run these searches at any time using the 'Saved Searches' option in Archie. See [Saving and loading searches](#).

### 1. Active authors in a given country

Advanced Search: People. Match all rows (AND)

Role in Group Type | Author | Review Group | Active

Document Role | Author | in | Any group | On any document

Country | Is | [Select country]
